◆ PROFILE

Building reliable, secure, AI-augmented products at enterprise scale.

Senior Full Stack Developer with 8.5+ years building production-grade web platforms for healthcare and pharmaceutical technology — now expanding deep into GenAI and agentic AI engineering.

Currently SDE-4 at IQVIA R&D Solutions, leading a clinical data platform and building AI-assisted tooling for document retrieval, structured extraction and contextual Q&A within regulated, HIPAA-aligned environments.

Core strength across React, Next.js, Node.js, TypeScript, AWS and system design — paired with active, hands-on growth in Python/FastAPI, RAG pipelines, vector databases and LLM evaluation.

SDE-4, Senior Full Stack Engineer | IQVIA, R&D Solutions

Clinical technology • Full stack architecture • GenAI enablement

Full Stack & Platform Leadership

- Lead full-stack engineering for a clinical data management platform supporting pharmaceutical R&D.
 - Built with React.js, Next.js, Node.js and TypeScript.
- Improved application/API performance by **~30%**.
 - Through profiling, batching, caching and query restructuring; standardized JWT/RBAC and multi-tenant support.
- Cut deployment time from 35-40 minutes to **under 25 minutes**.
 - Revamped Jenkins/AWS pipelines; mentor three engineers.

AI / GenAI Responsibilities

- Design and prototype RAG pipelines for clinical document ingestion, chunking and semantic retrieval.
 - Ground responses via embeddings and vector similarity search.
- Build structured extraction workflows from unstructured clinical documents.
 - LLM prompting with schema validation before data enters downstream systems.
- Architect secure enterprise-to-LLM integration patterns.
 - RBAC-scoped access, prompt/output sanitization, sensitive-data handling, full audit logging.
- Partner with compliance and clinical stakeholders on AI guardrails.
 - PII redaction and traceability requirements before AI features reach production.

IQVIA PROJECT — eCOA CLINICAL TRIAL PLATFORM

- Enterprise eCOA platform supporting ePRO, ClinRO, ObsRO and PerfO workflows.
 - Protocol-driven forms, offline/cloud sync and sponsor/CRO monitoring.
- Extended AI-assisted engineering into the eCOA workflow.
 - Document ingestion, semantic retrieval, structured extraction and citation-backed Q&A, with RBAC-scoped, audit-logged LLM integration patterns.

Core stack: React.js • Next.js • Node.js • TypeScript • AWS • JWT/RBAC • Multi-tenancy • CI/CD

■ EDUCATION

B.E. Computer Science

Govt. College of Engineering, Kalahandi (GCEK), BPUT, Odisha

Oct 2020 - Oct 2024

Healthcare prior authorization platform

- Owned full-stack delivery across complex healthcare insurance workflows.

– Progressed from frontend development to broader backend and architecture ownership.

• Reduced page-load time by ~25% and improved API response time by ~20%.

– React performance redesign, Redis caching and MongoDB query optimization.

• Raised engineering quality bar across teams.

– Introduced SonarQube CI gates; built a reusable Storybook component library adopted by three product teams.

●

Dec 2018 - Aug 2020

Software Engineer | L&T Technology Services

Doctor Portal — greenfield healthcare application

- Built a React/Node.js/MongoDB application from architecture through production.

– Covered authentication, roles, file uploads and notifications.

• Maintained 95% unit/integration test coverage.

– Using Jest, Mocha and Chai.

●

Apr 2018 - Aug 2018

Associate Software Engineer | Huawei Technologies

- Delivered JavaScript UI fixes and feature enhancements in a large enterprise codebase using Git, code review and Agile delivery.

◆ PERSONAL IMPROVEMENT PROJECTS

GitHub: github.com/sashikantcodex — hands-on AI/full-stack portfolio: RAG, AI services, secure APIs, cloud-native delivery.

◆ AI Knowledge Assistant

- Enterprise document Q&A app for PDF/DOCX ingestion, semantic search and citation-backed RAG chat.

– Production-shaped web/API/AI-service layers.

– Tech: Next.js, Node/Express, FastAPI, MongoDB, ChromaDB, Gemini/OpenAI, WebSockets, JWT, Docker

◆ AI Recruitment Platform

- AI-assisted ATS covering JD creation through onboarding.

– Resume parsing, JD-resume scoring, policy RAG, interview-question generation, salary benchmarking.

– Tech: Next.js 16, React 19, Express 5, FastAPI, MongoDB, OpenAI SDK, Docker Compose, GitHub Actions, K8s
